ASSEMBLY INSTRUCTIONS

DVP42018
DVP42038

Warning
All electrical connections must be made according to local codes. If you feel you do not have the experience necessary to do this, please have your fixture installed by a qualified, licensed electrician.

Make sure to note the maximum recommended wattage for your light fixture.
DO NOT EXCEED THE RECOMMENDED WATTAGE:

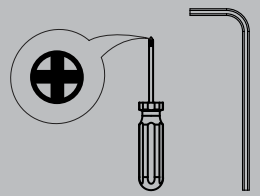

DVP42018 - 1 x 10W AC LED
DVP42038 - 1 x 24W AC LED

Cleaning
We recommend that you use a mild detergent, such as dish washing soap, and warm water to clean the glass and metal surfaces. After cleaning, make sure to dry the fixture completely because moisture will corrode the satin finish. Use a damp soft cloth to wipe off dust. DO NOT use abrasive pads or cleaning materials.

During installation, some fixtures may require subtle adjustments in order for the fixture to look as intended.

Tools

Phillips Head Screwdriver
Allen Key

3

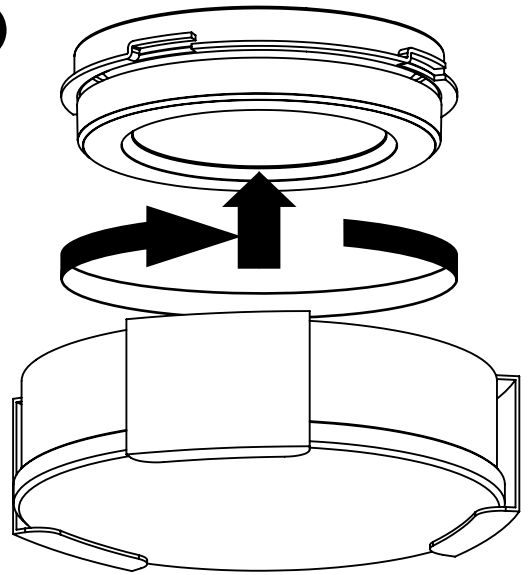

A. Connect both the fixture copper ground wire and the green-yellow wire to the junction box ground wire - If you only have two wires coming from the junction box, connect the fixture's copper wire and the green-yellow wire to the green ground screw on the mounting plate.
B. Connect the white fixture wire (or ribbed wire) to white supply wire.
C. Connect the black fixture wire to black supply wire.

3

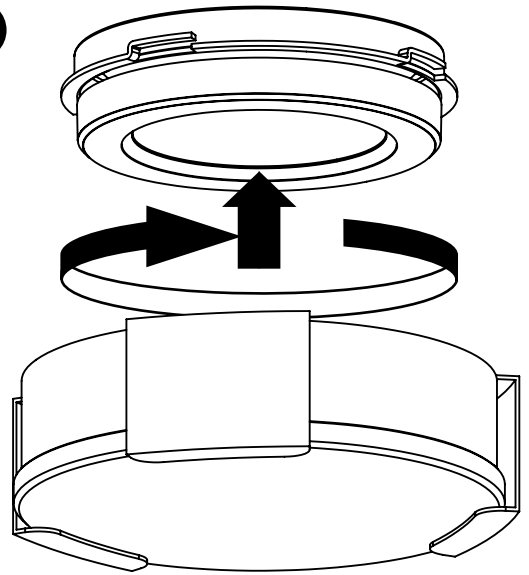

A. Fixez les fils de mise à terre du luminaire (le fil en cuivre et le fil vert et jaune) à la mise à la terre de la boîte de jonction. S'il n'y a que deux fils qui sortent de la boîte de sortie électrique, fixez les fils de mise à terre de l'appareil d'éclairage à la vis de mise à terre verte de la barre transversale.
B. Brancher le fil blanc au fil blanc du luminaire (ou nervuré).
C. Brancher le fil noir au fil noir du luminaire.
